Neuroeconomics. Edition No. 2

Description: In the years since it first published, Neuroeconomics: Decision Making and the Brain has become the standard reference and textbook in the burgeoning field of neuroeconomics. The second edition, a nearly complete revision of this landmark book, will set a new standard. This new edition features five sections designed to serve as both classroom-friendly introductions to each of the major subareas in neuroeconomics, and as advanced synopses of all that has been accomplished in the last two decades in this rapidly expanding academic discipline.

The first of these sections provides useful introductions to the disciplines of microeconomics, the psychology of judgment and decision, computational neuroscience, and anthropology for scholars and students seeking interdisciplinary breadth.

The second section provides an overview of how human and animal preferences are represented in the mammalian nervous systems. Chapters on risk, time preferences, social preferences, emotion, pharmacology, and common neural currencies—each written by leading experts—lay out the foundations of neuroeconomic thought.

The third section contains both overview and in-depth chapters on the fundamentals of reinforcement learning, value learning, and value representation. The fourth section, "The Neural Mechanisms for Choice," integrates what is known about the decision-making architecture into state-of-the-art models of how we make choices.

The final section embeds these mechanisms in a larger social context, showing how these mechanisms function during social decision-making in both humans and animals.

The book provides a historically rich exposition in each of its chapters and emphasizes both the accomplishments and the controversies in the field. A clear explanatory style and a single expository voice characterize all chapters, making core issues in economics, psychology, and neuroscience accessible to scholars from all disciplines. The volume is essential reading for anyone interested in neuroeconomics in particular or decision making in general.

KEY FEATURES

- Editors and contributing authors are among the acknowledged experts and founders in the field, making this the authoritative reference for neuroeconomics
- Suitable as an advanced undergraduate or graduate textbook as well as a thorough reference for active researchers
- Introductory chapters on economics, psychology, neuroscience, and anthropology provide students and scholars from any discipline with the keys to understanding this interdisciplinary field
- Detailed chapters on subjects that include reinforcement learning, risk, inter-temporal choice, drift diffusion models, game theory, and prospect theory make this an invaluable reference
- Published in association with the Society for Neuroeconomics
- Full-color presentation throughout with numerous carefully selected illustrations to highlight key concepts

Contents:

Foreword
Introduction

Section 1: The Fundamental Tools of Neuroeconomics
1. Basic Methods from Neoclassical Economics
2. Experimental Economics and Experimental Game Theory
4. Estimation and Testing of Computational Psychological Models
5. Introduction to Neuroscience
6. Experimental Methods in Cognitive Neuroscience
Human Decision-Making Strategies

Section 2: Neural and Psychological Foundations of Economic Preferences
8. The Computation of Stimulus Values in Simple Choice
9. Valuation for Risky and Uncertain Choices
10. Valuation, Intertemporal Choice, and Self-Control
11. Social Preferences and the Brain
12. Neuroeconomics of Emotion and Decision Making
13. Multistage Valuation Signals and Common Neural Currencies
14. Pharmacology of Economic and Social Decision Making

Section 3: Learning and Valuation
15. Value Learning through Reinforcement: The Basics of Dopamine and Reinforcement Learning
16. Advanced Reinforcement Learning
17. The Basal Ganglia, Reinforcement Learning, and the Encoding of Value
18. From Experienced Utility to Decision Utility

Section 4: The Neural Mechanisms for Choice
19. Neural Mechanisms for Perceptual Decision Making
20. Value-based Decision Making
21. Multiple Systems for Valuation Learning
22. Integrating Benefits and Costs in Decision Making
23. Neuronal Circuit Computation of Choice
24. The Neurobiology of Context-Dependent Valuation and Choice

Section 5: Brain Circuitry of Social Valuation and Social Choice
25. The Neural Basis of Strategic Choice
27. Understanding Others: Brain Mechanisms of Theory of Mind and Empathy

Epilogue: Summary, Conclusions, and Prognostications
Appendix: Prospect Theory and the Brain

Payment Information

Please indicate the payment method you would like to use by selecting the appropriate box.

☐ Pay by credit card: You will receive an email with a link to a secure webpage to enter your credit card details.

☐ Pay by check: Please post the check, accompanied by this form, to:
Research and Markets,
Guinness Center,
Taylors Lane,
Dublin 8,
Ireland.

☐ Pay by wire transfer: Please transfer funds to:
Account number 833 130 83
Sort code 98-53-30
Swift code ULSBIE2D
IBAN number IE78ULSB98533083313083
Bank Address Ulster Bank,
27-35 Main Street,
Blackrock,
Co. Dublin,
Ireland.
