The Role of Animals in Emerging Viral Diseases

Description: The Role of Animals in Emerging Viral Diseases presents what is currently known about the role of animals in the emergence or re-emergence of viruses including HIV/AIDS, SARS, Ebola, avian flu, swine flu, and rabies. It presents the structure, genome, and methods of transmission that influence emergence and considers non-viral factors that favor emergence, such as animal domestication, human demography, population growth, human behavior, and land-use changes.

When viruses jump species, the result can be catastrophic, causing disease and death in humans and animals. These zoonotic outbreaks reflect several factors, including increased mobility of human populations, changes in demography and environmental changes due to globalization. The threat of new, emerging viruses and the fact that there are no vaccines for the most common zoonotic viruses drive research in the biology and ecology of zoonotic transmission.

In this book, specialists in 11 emerging zoonotic viruses present detailed information on each virus's structure, molecular biology, current geographic distribution, and method of transmission. The book discusses the impact of virus emergence by considering the ratio of mortality, morbidity, and asymptomatic infection and assesses methods for predicting, monitoring, mitigating, and controlling viral disease emergence.

- Analyzes the structure, molecular biology, current geographic distribution and methods of transmission of 10 viruses
- Provides a clear perspective on how events in wildlife, livestock, and even companion animals have contributed to virus outbreaks and epidemics
- Exemplifies the "one world, one health, one medicine" approach to emerging disease by examining events in animal populations as precursors to what could affect humans

Contents: Foreward
Introduction
Chapter 1: Foot & Mouth Disease
Chapter 2: Canine Parvovirus
Chapter 3: Rabies
Chapter 4: Lassa virus
Chapter 5: Hendra virus
Chapter 6: West Nile virus
Chapter 7: Rift Valley fever virus
Chapter 8: SIV/HIV
Chapter 9: Hantavirus
Chapter 10: Nipah virus
Chapter 11: Synthesis

Order by Fax - using the form below
Order by Post - print the order form below and send to Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit http://www.researchandmarkets.com/contact/

Order Information
Please verify that the product information is correct.

Product Name: The Role of Animals in Emerging Viral Diseases
Web Address: http://www.researchandmarkets.com/reports/2634407/
Office Code: SCBRV7WK

Product Format
Please select the product format and quantity you require:

Quantity
Hard Copy (Hard Back): [ ] USD 75 + USD 29 Shipping/Handling

* Shipping/Handling is only charged once per order.

Payment Information

Please indicate the payment method you would like to use by selecting the appropriate box.

☐ Pay by credit card: You will receive an email with a link to a secure webpage to enter your credit card details.

☐ Pay by check: Please post the check, accompanied by this form, to:

Research and Markets,
Guinness Center,
Taylors Lane,
Dublin 8,
Ireland.

☐ Pay by wire transfer: Please transfer funds to:

Account number 833 130 83
Sort code 98-53-30
Swift code ULSBIE2D
IBAN number IE78ULSB98533083313083
Bank Address Ulster Bank,
27-35 Main Street,
Blackrock,
Co. Dublin,
Ireland.
