Global Cloud Security Software Market 2015-2019

Description: About Cloud Security Software
Cloud security software offers security to cloud-based services or cloud computing architectures. Cloud security software can be standalone solution or a suite of products. It focuses on key parameters such as data protection, compliance, architecture, governance, as well as identity and access. A typical cloud security solution offers features such as encryption, IAM, endpoint monitoring, vulnerability scanning, intrusion detection, and application and messaging security. Cloud security software helps in protecting the cloud content from unauthorized access and theft of data.

The analysts forecast the Global Cloud Security Software market to grow at a CAGR of 48.46 percent over the period 2014-2019.

Covered in this Report
This report covers the present scenario and the growth prospects of the Global Cloud Security Software market for the period 2015-2019. To calculate the market size, the report considers revenue generated from the sales of cloud security software solutions.

The report consolidates the revenues generated from the following major geographical areas:
- Americas
- APAC
- EMEA

The report, the Global Cloud Security Software Market 2015-2019, has been prepared based on an in-depth market analysis with inputs from industry experts. The report covers the Americas, and the APAC and EMEA regions; it also covers the Global Cloud Security Software market landscape and its growth prospects over the coming years. The report includes a discussion of the key vendors operating in this market.
