Credibility Assessment

Description:
In 2001, the late Murray Kleiner and an array of experts contributed to the Handbook of Polygraph Testing, published by Elsevier, which examined the fundamental principles behind polygraph tests and reviewed the key tests and methods used at that time. In the intervening thirteen years, the field has moved beyond traditional polygraph testing to include a host of biometrics and behavioral observations. The new title reflects the breadth of methods now used.

Credibility Assessment builds on the content provided in the Kleiner volume, with revised polygraph testing chapters and chapters on newer methodologies, such as CNS, Ocular-motor, and behavioral measures. Deception detection is a major field of interest in criminal investigation and prosecution, national security screening, and screening at ports of entry. Many of these methods have a long history, e.g., polygraph examinations, and some rely on relatively new technologies, e.g., FMRI and Ocular-motor measurements. Others rely on behavioral observations of persons in less restricted settings, e.g., airport screening. The authors, all of whom are internationally-recognized experts associated with major universities in the United States, United Kingdom, and Europe, review and analyze various methods for the detection of deception, their current applications, and major issues and controversies surrounding their uses. This volume will be of great interest among forensic psychologists, psychophysiology, polygraph examiners, law enforcement, courts, attorneys, and government agencies.

- Provides a comprehensive review of all aspects of methods for deception detection
- Includes methods being used in credibility, such as autonomic, CNS, FMRI, and Ocular-motor measures and behavioral and facial observation
- Edited by leaders in the field with over 25+ years of experience
- Discusses theory and application

Contents:
1. Theory of detection of deception
2. Validated polygraph examination procedures
3. Decision-making procedures for polygraph examinations
4. Polygraph examination countermeasures
5. Ocular-motor tests for deception
6. Central nervous system deception tests
7. Behavioral methods for detecting deception and mal-intent

Ordering:
Order Online - http://www.researchandmarkets.com/reports/2711575/
Order by Fax - using the form below
Order by Post - print the order form below and send to

Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit http://www.researchandmarkets.com/contact/
