
Description: Almost half of the total energy produced in the developed world is inefficiently used to heat, cool, ventilate and control humidity in buildings, to meet the increasingly high thermal comfort levels demanded by occupants. The utilisation of advanced materials and passive technologies in buildings would substantially reduce the energy demand and improve the environmental impact and carbon footprint of building stock worldwide.

Materials for energy efficiency and thermal comfort in buildings critically reviews the advanced building materials applicable for improving the built environment. Part one reviews both fundamental building physics and occupant comfort in buildings, from heat and mass transport, hygrothermal behaviour, and ventilation, on to thermal comfort and health and safety requirements.

Part two details the development of advanced materials and sustainable technologies for application in buildings, beginning with a review of lifecycle assessment and environmental profiling of materials. The section moves on to review thermal insulation materials, materials for heat and moisture control, and heat energy storage and passive cooling technologies. Part two concludes with coverage of modern methods of construction, roofing design and technology, and benchmarking of façades for optimised building thermal performance.

Finally, Part three reviews the application of advanced materials, design and technologies in a range of existing and new building types, including domestic, commercial and high-performance buildings, and buildings in hot and tropical climates.

This book is of particular use to, mechanical, electrical and HVAC engineers, architects and low-energy building practitioners worldwide, as well as to academics and researchers in the fields of building physics, civil and building engineering, and materials science.

- Explores improving energy efficiency and thermal comfort through material selection and sustainable technologies
- Documents the development of advanced materials and sustainable technologies for applications in building design and construction
- Examines fundamental building physics and occupant comfort in buildings featuring heat and mass transport, hygrothermal behaviour and ventilation

Contents: Part 1 Fundamental issues and building physics: Heat and mass transport
- Hygrothermal behaviour and simulation
- Ventilation, air quality and air-tightness
- Heat energy storage and cooling
- Thermal comfort
- Environmental health and safety. Part 2 Materials and sustainable technologies: Life cycle assessment
- Inorganic mineral insulation
- Natural fibre and fibre composite insulation
- Polymeric foam insulation
- Insulation for building equipment
- Reflective materials and radiant barriers
- Aerogel insulation
- Hygrothermal materials for heat and moisture control
- Desiccant materials for moisture control
- Phase change materials
- Porous materials for evaporative cooling
- Prefabricated units and modern methods of construction (MMC)
- Roofing materials
- Benchmarking performance of façades. Part 3 Application of advanced building materials and design:
- Materials and eco-building design
Domestic buildings
Commercial buildings
High performance buildings
New buildings
Refurbishment
Hot and tropical climates.

Ordering:

Order Online - [http://www.researchandmarkets.com/reports/2719784/](http://www.researchandmarkets.com/reports/2719784/)

Order by Fax - using the form below

Order by Post - print the order form below and send to

Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit
http://www.researchandmarkets.com/contact/

Order Information
Please verify that the product information is correct.

Web Address: http://www.researchandmarkets.com/reports/2719784/
Office Code: SC6IOFZV

Product Format
Please select the product format and quantity you require:

| Quantity | Hard Copy (Hard Back): | USD 280 + USD 29 Shipping/Handling |

* Shipping/Handling is only charged once per order.

Contact Information
Please enter all the information below in BLOCK CAPITALS

Title: ___________________________ Mr ☐ Mrs ☐ Dr ☐ Miss ☐ Ms ☐ Prof ☐

Fax Number: ___________________________

* Please refrain from using free email accounts when ordering (e.g. Yahoo, Hotmail, AOL)
Payment Information

Please indicate the payment method you would like to use by selecting the appropriate box.

☐ Pay by credit card: You will receive an email with a link to a secure webpage to enter your credit card details.

☐ Pay by check: Please post the check, accompanied by this form, to:
Research and Markets,
Guinness Center,
Taylors Lane,
Dublin 8,
Ireland.

☐ Pay by wire transfer: Please transfer funds to:
Account number: 833 130 83
Sort code: 98-53-30
Swift code: ULSBIE2D
IBAN number: IE78ULSB98533083313083
Bank Address: Ulster Bank,
27-35 Main Street,
Blackrock,
Co. Dublin,
Ireland.
