Pultrusion for Engineers. Woodhead Publishing Series in Composites Science and Engineering

Description: Pultrusion for engineers is a comprehensive overview of the latest developments and applications for this growing and increasingly important area of the fibre reinforced plastics industry.

Trevor Starr is well known as a specialist consultant with many year’s experience in the FRP world. He has assembled an international panel of distinguished experts to provide the widest possible coverage of the state-of-the-art in novel pultrusion applications and development including many leading US researchers such as Brandt Goldworthy, regarded by many as the father of modern pultrusion.

Because this book is one of very few to cover pultrusion, it is essential reading for industrial producers of pultruded profiles, chemical companies producing resins and composite materials specialists eager to reach the new markets in, for example, civil engineering that are rapidly being opened up to design solutions involving pultrusions.

Contents:

Composites and pultrusion
The pultrusion process
Profile design, specification, properties and related matters
Thermoset resins for pultrusion
Reinforcements for pultrusion
Pultrusion applications
a world-wide review
Infrastructure
a positive market
The future beyond 2000.

Ordering:

Order Online - http://www.researchandmarkets.com/reports/2736337/

Order by Fax - using the form below

Order by Post - print the order form below and send to

Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit
