Work quality management in the textile industry

Description: Textile manufacturing companies try to achieve quality and productivity by installing the latest technology and paying large salaries to those in the top level of the organization, but do not address the basic requirements of clean administration, improving the quality of work, or developing harmony among staff. Management can often get carried away by short term plans as they can look lucrative and therefore fail to make any effort to make the base stronger. Work quality management in the textile industry attempts to explain the importance of maintaining work quality which helps the industry to achieve stability and longer term results.

Contents: What is work quality? Self-development and work quality
Customer orientation and work quality
Team working and problem solving
Quality people: A key to excellence
Role of management in improving work quality
Key result areas and performance indicators of work quality
Five golden questions.
