Wto Accession and Socio-Economic Development in China. Chandos Asian Studies Series

Description: This book reviews how China's accession to the WTO has impacted upon its education, environment, economic and social outcomes in recent years. It has been argued that China's rapid growth in output and exports and subsequent accession to WTO has significantly increased income and therefore the well-being of the Chinese population. However, doubts are now being raised that higher income is generated at the cost of deteriorating environmental and social standards which has increasingly affected the health of the Chinese people, especially those who live in major industrial cities. Also, there is a widespread perception that its accession to WTO has significantly increased social shocks, especially among the farming community, and contributed to poor health outcomes among the rural population. These issues are critically analysed in this book by experienced academics from China and Australia.

- Includes contributions from Australian and Chinese scholars and thus, brings together ideas and suggestions from a broad range of perspectives
- Analyses China's socio-economic challenges from a multi-dimensional focus
- A very useful reference in WTO issues in general and China in particular

Contents:

Introduction: Socio-economic development in China
WTO accession and related issues. Education, environment and services: Reform of China's economic system with WTO accession and its impact on tertiary education
The relationship between economic globalization and higher education internationalization in China
