Top ICT spenders in the Italian Energy Sector - Estimated ICT budget breakdowns in 2013

Description: This report illustrates how Kable expects the top ICT spenders in Italy Energy industry to allocate their ICT budgets across the core areas of enterprise ICT spend, namely hardware, software, IT services, communications and consulting.

WHY WAS THE REPORT WRITTEN?

This report presents the output from Kable's ICT spend prediction statistical model, a log-linear regression model that provides ICT spending predictions based on a company's demographic profile. The statistical model has been developed using an extensive collection of survey and interview data Kable has conducted with ICT decision makers on their ICT spending, as well as the insight of our analyst team.

What makes this report unique and essential to read?

The predictions were formulated in November 2012 following a large survey of ICT decision makers. Estimated trends in ICT spending have been identified through to the end of 2013 following feedback from respondents on their forthcoming investment plans.
