Cell-wide Metabolic Alterations Associated With Malignancy, Vol 543.
Methods in Enzymology

Description: This new volume of Methods in Enzymology continues the legacy of this premier serial with quality chapters authored by leaders in the field. This volume covers research methods providing a theoretical overview on metabolic alterations of cancer cells and a series of protocols that can be employed to study oncometabolism, in vitro, ex vivo and in vivo. Malignant cells exhibit metabolic changes when compared to their normal counterparts, owing to both genetic and epigenetic alterations. Although such a metabolic rewiring has recently been indicated as "yet another" general hallmark of cancer, accumulating evidence suggests that the metabolic alterations of each neoplasm rather represent a molecular signature that intimately accompanies, and hence cannot be severed from, all facets of malignant transformation.

- Continues the legacy of this premier serial with quality chapters authored by leaders in the field
- Covers research methods in biomineralization science
- Contains sections on such topics providing a theoretical overview on metabolic alterations of cancer cells and a series of protocols that can be employed to study oncometabolism, in vitro, ex vivo and in vivo.

Contents:
1. Methods to measure cytoplasmic and mitochondrial Ca2+ concentration using Ca2+-sensitive dyes
2. Methods to measure intracellular Ca2+ fluxes with Organelle-Targeted aequorin-based probes
3. Methods to measure baseline Ca2+ levels with second-generation organelle-targeted fluorescent probes
4. Methods to assess the autophagic flux in malignant cells
5. Methods to assess autophagy in situ-transmission electron microscopy versus immunohistochemistry
6. Methods to measure the enzymatic activity of PI3Ks
7. Luciferase-based reporter to monitor the transcriptional activity of the SIRT3 promoter
8. Metabolomic profiling of cultured cancer cells
9. Pulsed stable isotope-resolved metabolomic studies of cancer cells
10. Single-cell imaging for the study of oncometabolism
11. Study of cellular oncometabolism via multi-dimensional protein identification technology
12. In vivo quantitative proteomics for the study of oncometabolism
13. Metabolomic profiling of neoplastic lesions in mice
14. Metabolomic profiling of tumor-bearing mice
15. Metabolomic studies of patient material by high-resolution magic angle spinning nuclear magnetic resonance (HR-MAS NMR) spectroscopy
16. Analysis of metabolomic profiling data acquired on GC-MS

Order by Fax - using the form below

Order by Post - print the order form below and send to

Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit http://www.researchandmarkets.com/contact/

Order Information
Please verify that the product information is correct.

Web Address: http://www.researchandmarkets.com/reports/2857085/
Office Code: SCD2STK7

Product Format
Please select the product format and quantity you require:

Quantity
Hard Copy (Hard Back): USD 177 + USD 29 Shipping/Handling

* Shipping/Handling is only charged once per order.

Contact Information
Please enter all the information below in BLOCK CAPITALS

Title: Mr [ ] Mrs [ ] Dr [ ] Miss [ ] Ms [ ] Prof [ ]

Payment Information

Please indicate the payment method you would like to use by selecting the appropriate box.

☐ Pay by credit card:  You will receive an email with a link to a secure webpage to enter your credit card details.

☐ Pay by check:  Please post the check, accompanied by this form, to:

Research and Markets,
Guinness Center,
Taylors Lane,
Dublin 8,
Ireland.

☐ Pay by wire transfer:  Please transfer funds to:
