
Description: One of Kalorama’s best-selling market research reports, this report provides the reader with a complete analysis of the domestic and international markets for pharmaceuticals to treat skin diseases and disorders. This edition of Worldwide Market for Prescription Dermatological Drugs is the sixth time Kalorama Information has comprehensively studied the dermatology markets.

Kalorama has completely re-evaluated the market from the ground up, and in addition to the usual primary research (interviews) of industry participants, clinicians, and regulators, we also conducted scores of interviews with users of Kalorama’s 2004 and 2006 dermatological studies to ensure that the current report contains the best possible data and the most useful analysis.

In this new edition, various shifts in the market are noted. There is information on biologics, discussion of fillers and of treatments for skin infections such as MRSA. New companies have been added and consolidations in the industry have been addressed.

Market information is available for the years 2004 to 2011, with the focus year 2006 for competitive analysis. Overview and product descriptions of general therapy segments are covered, including prescription drugs to treat:

Acne and Rosacea
Antiaging and Photodamage
Dermatitis and Seborrhea
Fungal Infections
Hair Loss and Hair Removal
Hyperpigmentation/Melasma
Psoriasis
Skin Cancer, and
Other Skin Disorders

Other data points include competitive market share, demographics, epidemiology, and geographic breakdown, which provide revenues for four regions:

United States
Europe
Japan
Rest of world

The study covers issues and trends affecting the market, research and developments, and more. In particular, the study explores the current and potential effects of the aging baby boomers on the prescription dermatology market and the continued demand for lifestyle drugs. Profiles of major market participants are included, including:
