International Construction Contract Law

Description: Large international construction projects often have a range of major contractors, subcontractors and consultants based in different parts of the world and working to different legal theories and understandings. This can lead to confusion in the understanding, interpretation and execution of the construction contract, which can result in significant disruption to the construction project.

International Construction Contract Law is written for anyone who needs to understand the legal and managerial aspects of large international construction projects, including consulting engineers, lawyers, clients, developers, contractors and construction managers worldwide. In 18 chapters it provides a thorough overview of civil law/common law interrelationships, delivery methods, standard forms of contract, risk allocation, variations, claims and dispute resolution, all in the context of international construction projects. Highly practical in approach it introduces legal analysis only when absolutely essential to understanding, the book also contains a range of useful appendices, including a 10-language basic dictionary of terms used in FIDIC forms.

1 International Construction Projects 1
1.1 The unique nature of the construction industry 1
1.2 Individuality of construction projects 1
1.3 Roles and relationships 2
1.3.1 Contractors 2
1.3.2 Designers 3
1.3.3 Regulators 3
1.3.4 Employers 3
1.3.5 Users 4
1.4 Contract administration: The Engineer 4
1.4.1 The Engineer 6
The Engineer’s certifications and fair determinations 7
2.4.1 Taking–over of the works 29
2.5 Binding nature of adjudication awards 31
2.6 Limitation of liability 31
2.7 Lapse of claim due to its late notification (time bars) 32
2.8 Allocation of unforeseeable and uncontrollable risk to the contractor 32
  2.8.1 Principle of good faith (good manners) protection 33
  2.8.2 Imprevention 37
  2.8.3 Protection of the weaker party 38
  2.8.4 Force majeure 38
  2.8.5 Hardship 39
  2.8.6 Frustration of purpose 40
  2.8.7 Impossibility 40
  2.8.8 Impracticability 41
2.9 Contract administration (The Engineer’s neutrality and duty to certify) 42
2.10 Termination in convenience 43
Vignette: Is an employer in breach of contract prevented from terminating the contract for its convenience? by Cecilia Misu (Germany) 44
2.11 Time–related issues 45
  2.11.1 Delay 45
  2.11.2 Disruption 45
  2.11.3 Ownership of floats 45
  2.11.4 Time at large and Extension of Time 46
  2.11.5 Concurrent delay 46
  2.11.6 Constructive acceleration 46
2.12 Quantification of claims 46
  2.12.1 Headquarters overhead claims 46
  2.12.2 Global claims 47
2.13 Statutory defects liability 47
2.14 Performance responsibility: reasonable skill and care versus fitness for purpose 47
2.15 Common law, civil law and Sharia interconnections 48

3 Common Delivery Methods

3.1 Common delivery methods: Main features

3.1.1 Design responsibility

3.1.2 Contract price determination

3.1.3 Contract administration

3.1.4 Risk allocation and admission of claims

3.2 General contracting

3.3 Design–build

3.3.1 Design–build procurement

3.3.2 Employer's requirements in design–build projects

3.4 Construction management

3.4.1 CM–at–risk

3.5 Multiple–prime contracts

3.6 Partnering

3.7 Alliancing

3.8 Extended delivery methods (PPP, BOT, DBO)

3.9 Further aspects of delivery methods

3.9.1 Fast track projects

3.9.2 Target cost contracts

3.9.3 Early contractor involvement and the pre-construction services agreement

3.9.4 Building information management systems
