Paraguay Bets on Overcoming Infrastructure Shortfall Through PPPs

Description: In recent years, Paraguay has only invested about US$400 million annually in infrastructure but through the PPP law enacted in late 2013 it aims to increase investment levels to a total of US$30 billion over the next 10 years. These opportunities have attracted increasing interest from international and regional companies, especially Brazilian ones, but Paraguayan companies are also aware of the opportunities in the sector through partnerships and consortiums that value their local knowledge and experience.

This report is also available in Spanish. Please contact us for more information.
