Data Center Infrastructure Support Services Market in Middle-East 2014-2018

Description: About Data Center Infrastructure Support Services in Middle East

Data centers are emerging as computational hubs for enterprises and end-users worldwide. The rise in digital content generation in enterprise networks has increased the demand for data center services. Many new data centers are being established in the Middle East to cater to the growing demand for digital content and computing requirement. UPS, cooling solutions, DCIM solutions, and data center rack solutions are the support services procured by enterprises, which is leading to their increased adoption in the Middle East. Infrastructure support services reduce operational costs of data centers as well as increase their performance levels.

The analysts forecast that the Data Center Infrastructure Support Services market in the Middle East will grow at a CAGR of 11.23 percent over the period 2013-2018.
