Global Water Treatment Products Market 2014-2018

Description: About Water Treatment Products

Water treatment products refer to products that assist in removing the impurities in water. Various types of water such as sea water, ground water, municipal drinking water, and waste water can be treated using water treatment products. The wide variety of applications of water treatment products is one of the major reasons for an increase in demand for these products. Water treatment technologies are used to remove or destroy pesticide active ingredients and other pollutants in water, making it suitable for industrial as well as domestic use. Water treatment products are generally classified based on the type of technologies used for water treatment.

The analysts forecast the Global Water Treatment Products market to grow at a CAGR of 8.5 percent over the period 2013-2018.
