
Description:

Converged Infrastructure Market by Components (Server, Networking, Storage, Infrastructure Software, Support Infrastructure), Services (Installation & Integration, Consulting & Professional, Maintenance & Support), Architecture Type, and End Users (Enterprises, Cloud Service Providers, Collocation Service Providers) - Worldwide Forecasts & Analysis (2014 - 2019)

Complex Information Technology (IT) infrastructure consists of various limiting factors, such as floor space, energy consumption, high density zones, separate cabling and configuration, data center infrastructure management, and staffing demands a new technology to meet the business objectives in a cost-effective and efficient manner. Converged infrastructure market solutions are standard, high-density, cost-effective, and energy-efficient “all-in-one” IT solutions which are providing profound solutions to the above-mentioned business concerns. They can accommodate the world’s most high-tech equipment including servers and networking, storage equipment, and infrastructure software which are useful in providing an integrated infrastructure solution to the end users.

The converged infrastructure solutions find applications in various verticals, such as Banking, Financial Services, and Insurance (BFSI), retail, IT and telecom, public sector, manufacturing, and healthcare.

It is expected that the BFSI, IT and telecom, and healthcare segments will show tremendous growth throughout the forecast period. However, there are a few revenue pockets, namely business services, manufacturing, retail, and wholesale segments, which will also show a significant increase in this period.

There are various assumptions that have been taken into consideration for market sizing and forecasting. A few of the global assumptions include political, economic, social, technological, and economic factors. For instance, exchange rates, one of the major economic factors, are expected to have a moderate rating of impact on this market. Therefore, the dollar fluctuations are not expected to enormously affect the forecasts in the emerging APAC region.

The report will help the market leaders or new entrants in this market in the following ways:
- This report segments the market into solutions, covering the market comprehensively. The report provides the closest approximations of the revenue numbers for the overall market and the sub-segments. The market numbers are further split across the different verticals and regions.
- This report will help the companies better understand the competitor and gain more insight to enhance its business position. There is a separate section on competitive landscape which includes competitor ecosystem, mergers and acquisition, and venture capital funding. Besides this, there are company profiles of the top 10 players in this market. In this section, market internals are provided that can put the company ahead of the competitors.
- The report helps them understand the pulse of the market. The report provides information on key market drivers, restraints, challenges, and opportunities.
