Analysis of Biomarker Data. A Practical Guide

Description: A how to guide for applying statistical methods to biomarker data analysis

Presenting a solid foundation for the statistical methods that are used to analyze biomarker data, Analysis of Biomarker Data: A Practical Guide features preferred techniques for biomarker validation. The authors provide descriptions of select elementary statistical methods that are traditionally used to analyze biomarker data with a focus on the proper application of each method, including necessary assumptions, software recommendations, and proper interpretation of computer output. In addition, the book discusses frequently encountered challenges in analyzing biomarker data and how to deal with them, methods for the quality assessment of biomarkers, and biomarker study designs.

Covering a broad range of statistical methods that have been used to analyze biomarker data in published research studies, Analysis of Biomarker Data: A Practical Guide also features:

- A greater emphasis on the application of methods as opposed to the underlying statistical and mathematical theory
- The use of SAS®, R, and other software throughout to illustrate the presented calculations for each example
- Numerous exercises based on real-world data as well as solutions to the problems to aid in reader comprehension
- The principles of good research study design and the methods for assessing the quality of a newly proposed biomarker
- A companion website that includes a software appendix with multiple types of software and complete data sets from the book’s examples

Analysis of Biomarker Data: A Practical Guide is an ideal upper-undergraduate and graduate-level textbook for courses in the biological or environmental sciences. An excellent reference for statisticians who routinely analyze and interpret biomarker data, the book is also useful for researchers who wish to perform their own analyses of biomarker data, such as toxicologists, pharmacologists, epidemiologists, environmental and clinical laboratory scientists, and other professionals in the health and environmental sciences.

Stephen W. Looney, PhD, is Professor in the Department of Biostatistics and Epidemiology at Georgia Regents University, USA. He is a Fellow of the American Statistical Association and the Royal Statistical Society, an elected member of the International Statistical Institute, and a member of the International Biometric Society.

Joseph L. Hagan, ScD, is Research Statistician at Texas Children’s Hospital and Assistant Professor at the Baylor College of Medicine, USA. He is a member of the American Statistical Association.

Contents:
Preface xiii
Acknowledgements xvii
1 Introduction 1
1.1 What is a Biomarker? 1
1.2 Biomarkers Versus Surrogate Endpoints 2
1.3 Organization of This Book 3
2 Designing Biomarker Studies 5
2.1 Introduction 5
2.2 Designing the Study 6
2.2.1 The Exposure Disease Association 6
2.2.2 Cross-sectional Studies 7
2.2.3 Case Control Studies 7
2.2.4 Retrospective Cohort Studies 9
2.2.5 Prospective Cohort Studies 9
2.2.6 Observational Studies 10
2.2.7 Randomized Controlled Trials 11
2.3 Designing the Analysis 13
2.3.1 Choosing the Appropriate Measure of Association 15
2.3.1.1 Odds Ratio versus Risk Ratio 15
2.3.1.2 Consequences of Not Choosing the Appropriate Measure of Association 16
2.3.2 Choosing the Appropriate Statistical Analysis 16
2.3.3 Choosing the Appropriate Sample Size 17
2.4 Presenting Statistical Results 18

Problems 20

3 Elementary Statistical Methods for Analyzing Biomarker Data 21
3.1 Introduction 21
3.2 Graphical and Tabular Summaries 21
3.3 Descriptive Statistics 26
3.4 Describing the Shape of Distributions 31
3.5 Sampling Distributions 33
3.6 Introduction to Statistical Inference 34
3.6.1 Point Estimation and Confidence Interval Estimation 34
3.6.2 Hypothesis Testing 38
3.7 Comparing Means Across Groups 43
3.7.1 Two Group Comparisons 44
3.7.2 Multiple-Group Comparisons 45
3.8 Correlation Analysis 50
3.9 Regression Analysis 52
3.9.1 Simple Linear Regression 52
4.9.2 Choosing the Appropriate Statistical Analysis 225
4.9.3 Choosing the Appropriate Sample Size 226
4.9.4 Choosing a Statistical Method When Both the Predictor and the Outcome Are Dichotomous 226
4.9.4.1 Comparing Two Independent Groups in Terms of a Binomial Proportion 226
4.9.4.2 Exact Test for Independence of Rows and Columns in a 2 × 2 Table 230
4.9.4.3 Exact Inference for Odds Ratios 232
4.9.4.4 Inference for the Odds Ratio for Paired Data 234
4.9.5 Choice of a Statistical Method When the Predictor Is Ordinal and the Outcome is Dichotomous 237
4.9.5.1 Tests for a Significant Trend in Proportions 237
4.9.6 Choice of a Statistical Method When Both the Predictor and the Outcome are Ordinal 240
4.9.6.1 Test for Linear–by–Linear Association 240
4.9.7 Choice of a Statistical Method When Both the Predictor and the Outcome are Nominal 243
4.9.7.1 Fisher–Freeman–Halton Test 243
Problems 246

5 Validation of Biomarkers 255
5.1 Overview of Methods for Assessing Characteristics of Biomarkers 255
5.2 General Description of Measures of Agreement 257
5.2.1 Discrete Variables 257
5.2.1.1 Cohen’s Kappa 257
5.2.1.2 Extensions of Coefficient Kappa 265
5.2.1.3 Weighted Kappa 273
5.2.2 Continuous Variables 275
5.2.2.1 Pearson’s Correlation Coefficient 275
5.2.2.2 Alternatives to Pearson’s Correlation Coefficient 277
5.3 Assessing Reliability of a Biomarker 287
5.3.1 General Considerations 287
5.3.2 Assessing Reliability of a Dichotomous Biomarker 287
5.3.2.1 Dichotomous Biomarker More Than Two Raters 289
5.3.3 Assessing Reliability of a Continuous Biomarker 291
5.3.4 Assessing Inter–Subject Intra–Subject and Analytical Measurement Variability 292
5.4 Assessing Validity 294
5.4.1 General Considerations 294
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit http://www.researchandmarkets.com/contact/

Order Information
Please verify that the product information is correct.

Product Name: Analysis of Biomarker Data. A Practical Guide
Web Address: http://www.researchandmarkets.com/reports/2935896/
Office Code: SCH35RW9

Product Format
Please select the product format and quantity you require:

Quantity
Hard Copy (Hard Back): □ USD 114 + USD 29 Shipping/Handling

* Shipping/Handling is only charged once per order.

Payment Information

Please indicate the payment method you would like to use by selecting the appropriate box.

☐ Pay by credit card: You will receive an email with a link to a secure webpage to enter your credit card details.

☐ Pay by check: Please post the check, accompanied by this form, to:
Research and Markets,
Guinness Center,
Taylors Lane,
Dublin 8,
Ireland.

☐ Pay by wire transfer: Please transfer funds to:
Account number 833 130 83
Sort code 98-53-30
Swift code ULSBIE2D
IBAN number IE78ULSB98533083310383
Bank Address Ulster Bank,
27-35 Main Street,
Blackrock,
Co. Dublin,
Ireland.
