Description:
Future Oncology is an analytical newsletter for executives, researchers, and market analysts in the pharmaceutical, biotechnology, financial, hospital and other health care industries. It provides comprehensive, up-to-date analysis of scientific, technological, clinical and commercial developments in oncology.

Topics Covered in Future Oncology:

Epidemiology
Worldwide (North America, Europe, Japan, etc.) mortality and incidence estimates by gender, cancer subtype and stage; estimates of populations carrying certain markers and under treatment by type of therapy.

Mechanism in Malignancy
Etiology, pathogenesis and markers by type of cancer; exploitation of mechanisms of malignancy (apoptosis, angiogenesis, cell cycle regulation, multi-drug resistance, etc.) in screening, diagnosis, disease monitoring, prognosis and drug development, including databases of agents in development.

Technology Updates
Technological advances such as in vivo and ex vivo gene therapy using a variety of vectors and delivery approaches, monoclonal antibodies in diagnosis and therapy, radiopharmaceuticals, photodynamic therapy, immunotherapy/vaccines, hematopoietic support, and many more.

Drugs in Development, Markets and Developers
Profile of major oncology drug classes (taxanes, topoisomerase I inhibitors, platinum-based drugs, cell cycle regulators, etc.), estimated worldwide markets for commercialized drugs, descriptions of oncology-related operations of various commercial entities, including their affiliations.

Conference Coverage
Coverage of meetings in the cancer and related fields such as the International Congress on Anti-Cancer Chemotherapy (ICACC); International Conference on Monoclonal Antibody Immunoconjugates for Cancer; Annual Meeting of the American Association for Cancer Research (AACR); Digestive Disease Week; Annual Session of the American Society of Clinical Oncology (ASCO); Annual Meeting of the Society of Nuclear Medicine; International Congress of Chemotherapy; Interscience Conference on Antimicrobial Agents and Chemotherapy (ICAAC); and many more.
