Global Automotive Wiring Harness Market 2014-2018

Description: About Automotive Wiring Harness

An automotive wiring harness is an assemblage of cables or wires used in automobiles for transferring signals or electric power. It is also known as a wiring loom for automobiles. Electric wires are tied together with the help of different components such as cable ties, electrical tape, conduits, or a combination of these to form the complete wiring assembly. An automotive wiring harness is better safeguarded against the impact of vibrations than individual electric wires in automobiles. In addition, it is better secured from abrasions and moisture.

The analysts forecast the Global Automotive Wiring Harness market to grow at a CAGR of 8.06 percent over the period 2013-2018.
