Global Veterinary Anti-Infectives Market Segmented By Veterinary Disease Types, By Animal Types & By Geography - Trends & Forecasts 2014-2019

Description: Global market for veterinary anti-infectives is estimated to be worth $4.37 billion in 2014. Expected to grow at a healthy CAGR of 8.5%, the market is set to reach $6.92 billion by 2019.

For the past several decades, the veterinary health business units have been able to take advantage of antibiotics that have been sidelined by parent companies and to commercialize, for food animal applications, those products that were considered unsuitable for development as human medicine—owing to market share considerations.

The veterinary anti-infectives market is growing at a steady pace to combat the increasing number of infectious diseases in animals. Major constraint for the market is the high raw material cost, which makes anti-infective drugs not easily accessible to a majority of the animal population. However, with continuous innovation and rapid technological advancement, the chances of reducing the cost of anti-infective drugs are high.

This report provides an exhaustive coverage of the veterinary anti-infectives market through different categorizations. By type of products – Marbofloxacine, Florfenicol, Freeze-dried ceftiofur, Beta-lactams, Oxytetracycline and Amminosidin; By species within companion farm animals; By Geography - North America, Asia-Pacific, Europe and Rest of World.

Pfizer (U.S.), Merck (U.S.), Sanofi-Aventis (France), Bayer HealthCare (Germany), Virbac (France), Novartis (Switzerland), Boehringer Ingelheim (Germany), Heska Corporation (U.S.), Bioniche Animal Health Canada, Inc. (Canada), and Ceva (France) are the key players in the global animal anti-infectives market.

What makes our report unique?

1) In-depth analysis of current market trends and future forecasts of the market based on different anti-infectives available for animal healthcare.
2) We provide the longest possible market segmentation based on anti-infective type, animal species and by geography.
3) The comprehensive competitive landscape section in the report provides information about major players in the market, their market shares and recent developments.
