Global Civil Aviation Flight Training and Simulation Market 2014-2018

Description:
About Civil Aviation Flight Training and Simulation

Flight simulator and training systems artificially re-create aircraft flight and the flying environment, thus providing a real flying experience. In civil aviation flight training, such flight simulator systems are mainly used for pilot training. These systems are mainly categorized as full flight simulators (FFS) and flight training devices (FTD). Compared with airborne training, flight simulation-based training reduces the cost of flight crew training as well as the impact on environment.

The analysts forecast the Global Civil Aviation Flight Training and Simulation market to grow at a CAGR of 3.61 percent over the period 2013-2018.
