Global Market Expansion Services (MES) Market 2014-2018

Description:

About MES

MES is a premium sector of the Outsourcing industry, which helps end-users grow in their existing markets and expand to new ones. MES providers combine services offered by market research firms, consultants, sales agents, and legal advisors, and thus helps firms to cut costs and reduce complexity while expanding globally. This service also helps organizations set up marketing, sales, and distribution structures to realise their full potential in the existing or new markets. Unlike traditional outsourcing practises, MES has a key focus on front-to-end process and has a high level of customer interaction involved. Hence, it helps its end-users to increase the market share, while cutting costs and reducing operational complexity. It provides value-added services to its end-users with more focus on sales growth and increasing market share, rather than just cost cuts and efficiency gains. This makes it the most promising sector of the Outsourcing industry.

The analysts forecast the Global MES market to grow at a CAGR of 7.44 percent over the period 2013-2018.
