Global Mobile Crane Market 2014-2018

Description: About Mobile Crane

A mobile crane is "a cable-controlled crane mounted on crawlers or rubber-tired carriers" or "a hydraulic-powered crane with a telescoping boom mounted on truck-type carriers or as self-propelled models." They are designed for easy transportation of different types of load and cargo to a site with little or no setup or assembly. There are broadly three types of cranes: mobile cranes, marine and port cranes, and fixed cranes. Cranes can be categorized as per their load-lifting capacity, lift height, and outreach.

The analysts forecast the Global Mobile Crane market to grow at a CAGR of 6.81 percent over the period 2013-2018.
