Global SCM BPO Market 2014-2018

Description:
About Supply Chain Management BPO

Supply Chain Management (SCM) BPO is a segment of outsourcing, which consists of subcontracting the SCM business processes of an organization to a third-party vendor that has expertise in the domain. It is an effective strategy of delegating one or more business activities to external companies (vendors), which, in turn, administer and manage the selected activity, based on defined and measurable performance criteria. It helps clients to increase their operational efficiency, concentrate on their core competencies, reduce time-to-market, obtain access to fresh talent and experience along with latest technologies, and build an organization with economical cost structure in the long run.

The analysts forecast the Global SCM BPO Market to grow at a CAGR of 9.58 percent over the period 2013-2018.
