State Forecast Database

Description: The quarterly state forecast database contains all the key economic data on the state level necessary to run a thoughtful analysis of past, current and future economic conditions for each US state.

Our quarterly state forecast database begins with the creation of a uniform set of state level data, built to be comparable amongst all 50 states and the total US. Using this state data, we have built unique economic models on key components of each states' economy. Subscribers have the competitive advantage of being able to easily run state by state comparisons and thorough analysis on major aspects of each states' economy.

The indicators are provided in a flat file database format with full historical data and 10 quarter out forecasts and include the following:

- Real Gross Domestic Product (GSP), Billions of Chained 2009 $, SAAR
- Gross Domestic Product (GSP), Billions of Current Dollars, SAAR
