Global Mobile Broadband Market in Public Safety 2014-2018

Description: About Global Mobile Broadband

Safety and security is critical to any country's prosperity. Public safety is all about right information to the right person at the right time to keep the surrounding safe. This can be achieved by using mobile broadband, which is a transformational technology. Mobile broadband is the introduction of next generation of wireless data technology in the mission-critical field applications, equipping people with the best real-time data, video, voice or other forms of tactical communication, and rich media services. Ambulance crews can send vision of an injured person to doctors at a hospital so that an early diagnosis can be made and treatment can be started as quickly as possible. Police officers responding to an incident can actually have access to video and information about the scene they are about to walk into. Fire personnel can also have information about the environment they are working in real time, being able to pull down maps, information, images of the building of the suspects, and more information in the hands of people who are actually doing the job, enabling them to give their best during the critical times.

The analysts forecast the Global Mobile Broadband market in public safety to grow at a CAGR of 7.81 percent over the period 2013-2018.

Covered in this Report
The Global Mobile Broadband market in public safety can be classified into two major segments based on user category: Private Sector and Public Sector. The market is segmented on the basis of public safety by application: Vehicle Surveillance, Medical Telemetry, GIS, Natural Calamity and Disaster Management, and Video Surveillance. The market is also segmented on the basis of solution: Services, Devices, Equipment, and Network and Infrastructure.

The report, Global Mobile Broadband Market in Public Safety 2014-2018, has been prepared based on an in-depth market analysis with inputs from industry experts. The report covers the North America, Latin America, the EMEA, and the APAC regions; it also covers the Global Mobile Broadband market landscape and its growth prospects in the coming years. The report also includes a discussion of the key vendors operating in this market.
