Global Meat Market 2014-2018

Description: About Meat Market

The Meat industry is a fast-paced sector and is growing at a steady rate. The market is stagnant in developed regions such as North America and Western Europe, but the Global Meat market is growing because of increased consumption of meat. Also, increased demand from developing nations such as China, Brazil, Russia, and India is driving the market positively and this trend is expected to continue during the forecast period. However, rising animal diseases, increasing water pollution, and rising concern for the environment are acting as a threat to the Global Meat market. Despite such challenges, the market will be driven by the growing population, growing prospects of E-commerce, and rising demand for halal meat.

The analysts forecast the Global Meat market is growing at a steady pace and is expected to witness 3.97 percent and 2.22 percent CAGR growth in terms of revenue and volume, respectively, over the period 2013-2018.
