System Integration Market in Indonesia 2014-2018

Description: About System Integration

System integration is a process wherein various components such as hardware, software, and IT services are unified into one system, ensuring all functions are running together. System integration plays an integral role in maintaining the business processes of an organization. These include application development and maintenance, software and hardware deployment, and the support and integration of applications and infrastructure products. It also includes system integration services related to ERP. The Global System Integration Services market is a sub-segment of the Global IT Services market and is served by two types of vendors - global IT vendors, and small vendors serving regional markets.

The analysts forecast the System Integration market in Indonesia 2014-2018 to grow at a CAGR of 16.84 percent over the period 2013-2018.
