Description: UK is the second largest producer of oil in Europe. The Scottish population in majority voted for no separation with UK and this will help the country to maintain the same level of production of oil. The market for artificial lift systems will also grow after tense situation diffusing in the region.

Artificial lift is a process used on oil wells to increase pressure within the reservoir and encourage oil to the surface. When the natural drive energy of the reservoir is not strong enough to push the oil to the surface, artificial lift is employed to recover more production.

While some wells contain enough pressure for oil to rise to the surface without stimulation, most don't, requiring artificial lift. In fact, 96% of the oil wells in the US require artificial lift from the very beginning.

Even those wells that initially possess natural flow to the surface, that pressure depletes over time, and artificial lift is then required. Therefore, artificial lift is generally performed on all wells at some time during their production life.

Although there are several methods to achieve artificial lift, the two main categories of artificial lift include pumping systems and gas lifts.

The most common type of artificial lift pump system applied is beam pumping, which engages equipment on and below the surface to increase pressure and push oil to the surface. Consisting of a sucker rod string and a sucker rod pump, beam pumps are the familiar jack pumps seen on onshore oil wells.

Another artificial lift pumping system, hydraulic pumping equipment applies a downhole hydraulic pump, rather than sucker rods, which lift oil to the surface. Here, the production is forced against the pistons, causing pressure and the pistons to lift the fluids to the surface. Similar to the physics applied in waterwheels powering old-fashion gristmills, the natural energy within the well is put to work to raise the production to the surface.

Electric submersible pump systems employ a centrifugal pump below the level of the reservoir fluids. Connected to a long electric motor, the pump is composed of several impellers, or blades, that move the fluids within the well. The whole system is installed at the bottom of the tubing string. An electric cable runs the length of the well, connecting the pump to a surface source of electricity.

What the Report Offers

1- Market Definition for the specified topic along with identification of key drivers and restraints for the market.
2- Market analysis for the global artificial lift systems Market, with region specific assessments and competition analysis on a global and regional scale.
3- Identification of factors instrumental in changing the market scenarios, rising prospective opportunities and identification of key companies which can influence the market on a global and regional scale.
4- Extensively researched competitive landscape section with profiles of major companies along with their share of markets.
5- Identification and analysis of the Macro and Micro factors that affect the global artificial lift systems market on both global and regional scale.
6- A comprehensive list of key market players along with the analysis of their current strategic interests and key financial information.

Contents: 1. Introduction 1.1 Report Guidance 1.2 Markets Covered 1.3 Key Points Noted
2. Executive Summary

3. Market Overview
3.1 Introduction
3.2 Market Definition
3.3 Premium Insights
3.4 Artificial Lift System Components

4. Drivers, Constraints and Opportunities
4.1 Drivers
4.1.1 Increasing Drilling Activity
4.1.2 Need to Enhance Production Levels
4.1.3 New Exploration Activities
4.2 Constraints
4.2.1 Equipment Costs
4.2.2 Lack of Skilled Labour
4.3 Opportunities
4.3.1 Increasing Subsea Drilling

5. United Kingdom Artificial Lift Systems Market Analysis, by Installations
5.1 Electric Submersible Pump System
5.2 Progressive Cavity Pump System Component Market
5.3 Rod Lift Component Market

6. United Kingdom Artificial Lift Systems Market Analysis
6.1 Introduction
6.2 Market Demand to 2020
6.3 Recent Trends and Opportunities

7. Competition
7.1 Overview
7.2 Market Share of Key Companies, by Geography
7.3 Market Share of Key Companies, by Equipment

8. Company Profiles
8.1 Baker Hughes Inc.
8.2 Halliburton Company
8.3 Schlumberger Limited
8.4 Weatherford International Ltd
8.5 General Electric Energy
8.6 Borets Company Llc
8.7 National Oilwell Varco Inc.
8.8 Torqueflow Sydex Ltd
8.9 Compass Energy
8.10 Gulf Coast Pump & Supply

9. Competitive Landscape
9.1 Deal Summary
9.1.1 Acquisition
9.1.2 Private Equity
9.1.3 Equity Offerings
9.1.4 Debt Offerings
9.1.5 Partnerships
9.1.6 Asset Transactions
9.2 Recent Developments
9.2.1 New Technology Inventions
9.2.2 New Contract Announcements

10. Appendix
10.1 Sources
10.2 Abbreviations
10.3 Market Definition
10.3.1 Methodology
10.3.2 Coverage
10.3.3 Secondary Research
10.3.4 Primary Research
10.3.5 Expert Panel Validation
10.4 Contact Us
10.5 Disclaimer

Ordering:

Order Online - [http://www.researchandmarkets.com/reports/3045312/](http://www.researchandmarkets.com/reports/3045312/)

Order by Fax - using the form below

Order by Post - print the order form below and send to

Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit
http://www.researchandmarkets.com/contact/

Order Information
Please verify that the product information is correct and select the format(s) you require.

Web Address: http://www.researchandmarkets.com/reports/3045312/
Office Code: SCH3ODQA

Product Formats
Please select the product formats and quantity you require:

<table>

Payment Information

Please indicate the payment method you would like to use by selecting the appropriate box.

☐ Pay by credit card: You will receive an email with a link to a secure webpage to enter your credit card details.

☐ Pay by check: Please post the check, accompanied by this form, to:
Research and Markets,
Guinness Center,
Taylors Lane,
Dublin 8,
Ireland.

☐ Pay by wire transfer: Please transfer funds to:

<table>
