Trigeminocardiac Reflex

Description: Trigeminocardiac Reflex is a comprehensive tutorial reference to the science, diagnosis, and possible treatment of the trigeminocardiac reflex (TCR) that is usually initiated when the trigeminal nerve is disturbed during intercranial surgery. Since first reported in 1999 by co-Editor Bernhard Schaller, the research focused on TCR is expanding. While its instance is rare, new discoveries are not only increasing diagnosis, but also providing more effective treatment protocols. This text is ideal as a reference for clinical and research neurologists, as a general introduction for clinical presentation, and as a foundation for new research.

- Represents the first tutorial reference focused on the Trigeminocardiac Reflex (TCR)
- Content organized by two of the leading scientists in the area, Dr. Tumul Chowdhury (University of Manitoba) and Prof. Bernhard Schaller (University of Southampton)
- Defines TCR, its onset, and possible treatments
- Establishes a knowledge base for the future study of the TCR and treatment protocols
