Global WLAN Security Market 2015-2019

Description: About WLAN Security

WLAN is a computer network, which does not require a wired connection for connectivity between devices. It enables data transmission at a high speed, varying between 1 Mbps and 600 Mbps. WLAN is used by individuals at home, enterprises, SMEs, and government organizations. It helps users to access applications and data from remote areas. WLAN also ensures increased bandwidth with the evolution of new technologies, thus leading to improved performance of the network. WLAN faces certain challenges such as cyber-attacks and data theft, leading to loss of data and concerns over data security.

The analysts forecast the Global WLAN Security market to grow at a CAGR of 20.01 percent over the period 2014-2019.
