Global NFC Transaction Market 2015-2019

Description: About NFC Transaction

NFC is a standard short-range connectivity, which uses high frequency wireless communication technology for peer-to-peer communication between two devices. End-users can use this technology to transfer data from one devices to another. NFC technology has revolutionized the ways in which people access, use data and information. NFC-enabled devices can be used for mobile payment, loyalty programs, interactive advertising, ID authentication, and transit fare collection. NFC transactions are the contactless transaction that uses NFC technology through mobile devices.
