Global Automotive Oil Filter Market 2015-2019

Description: About Automotive Oil Filter market

An automotive oil filter is a device designed to remove impurities and undesired components from the circulating engine oil. Engine oil lubricates the engine and needs to be freed from the particles that may increase the friction against the piston movement and hence reduces the efficiency of the engine. Canister-type filters are the most commonly used automotive oil filters. The analysts forecast the Global Automotive Oil Filter Market to grow at a CAGR of 5.70 percent over the period 2014-2019.
