World Radiocommunication Conference 2015

Description: IMT/4G - Broadband PPDR - Satellite: decisions to take

At the WRC-15 in November 2015, decisions are to be taken in one month on three major items: IMT/4G, Broadband PPDR and satellite. A number of bands below 6 GHz are candidates for IMT technologies in Europe including the 700 MHz band.

In Europe, a minimum of 2x10 MHz is requested for Broadband PPDR. Channelling of the 700 MHz band is still being debated.

This report presents the major WRC-15 agenda items.
