Global Fish and Seafood Market 2014-2018

Description:

About Fish and Seafood

Fish and seafood include various types of fishes and other eatable sea animals. The global population is growing, and with it, the demand for food, including seafood, is also increasing. According to the World Bank, it is expected that by 2030, 70 percent of the demand for fish and seafood will come from the APAC region. Therefore, to meet the demand for fish and seafood by the middle of the century, the global production of fish and seafood needs to increase more than twofold.

The analysts forecast the Global Fish and Seafood market to grow at a CAGR of 4.16 percent and 3.48 percent in terms of revenue and volume, respectively, over the period 2013-2018.
