Software Defined Storage (SDS) Market by Component, & by Company Size - Global Forecast to 2019

Description: Software Defined Storage (SDS) Market by Component (Storage Hypervisor, Storage Virtualization Software, Control Planes, Data Services), & by Company Size (Small Businesses, Medium Businesses, Enterprises, Large Enterprises) - Global Forecast to 2019

The software defined storage market has gained major importance due to the explosion of data center services. The software defined storage includes storage hypervisors, storage virtualization software, control plane, and data services. The enterprises are continuously trying to run data centers in an efficient and cost-effective way. In order to use less energy and infrastructure from their end, SME's are seeking storage virtualization facilities to minimize their ICT expending. Enterprises of all sizes are showing an increased interest in outsourcing their expensive in-house data storage services to the third party SDS providers.

Software Defined storage is playing vital role in various industry verticals as to cater their IT needs efficiently. It helps organizations to meet regulatory norms and attain efficiency in the data center operations. The storage virtualization is increasing at a higher pace. The financial services, healthcare, and manufacturing vertical is expected to hold the highest market share of the software defined storage market throughout the forecast period of 2014 to 2019 followed by government, education, and defence & aerospace verticals. There are huge business opportunities in the Asia-Pacific region, due to presence of rising economies in this region.
