Global Golf Cart Market 2015-2019

Description: About the Golf Cart Market

Golf carts are used by golfers to carry heavy golf clubs and equipment. They are also used for daily commuting needs over short distances. Golf carts are usually gasoline-powered or electric, but recently solar -powered golf carts have also been developed. Electric golf carts have more preference among consumers. The global economic recession of 2008-2009 had a negative impact on golf, which subsequently impacted the Golf Cart and Golf Equipment market worldwide. The economic recession impacted consumer preference due to financial instability and, hence, participation in golf declined. Since the economic recession, a subtle change has been observed in consumers’ choices, and there is renewed interest in golf. Golf has become an important sport even in the emerging economies such as China and India. The inclusion of golf in the 2016 Olympics, which will be held in Brazil, is expected to positively drive the growth of the Global Golf Cart market.

The analysts forecast the Global Golf Cart Market to grow at a CAGR of 4.29 percent over the period 2014-2019.
