Global Pressure Pumping Market in Oil and Gas Industry 2015-2019

Description:
About Pressure Pumping
Pressure pumping services increase access to the proven reserves, improve the asset value, ROI, and reservoir yield and integrity. They are generally used in maturing reservoirs or places where oil extraction conditions are challenging. The ever-increasing demand for oil and gas has led to a shift toward EOR. This has led to increased activities in unconventional gas plays, which utilize advanced techniques to enhance the reservoir recovery. Hence, pressure pumping has been gaining traction in the market due to increased process complexity of oil and gas exploration.

The analysts forecast the Global Pressure Pumping market in Oil and Gas industry to grow at a CAGR of 14.6 percent over the period 2014-2019.
