Electric Two-wheelers (E2Ws) Market in China 2015-2019

Description: About Electric Two-wheelers Market in China
E2W is a term used for electric motorcycles, scooters, and bicycles. They are powered by batteries instead of liquid fuel. E2Ws consist of a DC motor, controller, battery, and charger instead of an ICE, as used in liquid fuel-powered two-wheelers. E2Ws are considered more environment friendly as well as a fuel saving alternative in comparison with liquid fuel-powered two-wheelers, and are a sound choice for short-range travel requirements. E2Ws have become one of the successful mass-produced and adapted alternative-fuel vehicles since the start of motorization.

The analysts forecast the Electric Two-wheelers market in China to grow at a CAGR of 8.26 percent over the period 2014-2019.
