Active Pharmaceutical Ingredients (API) Market in the US 2015-2019

Description:
Active pharmaceutical ingredients (API) are active substances that are used in the manufacture of drugs and that have pharmacological effects. They provide health benefits and play a vital role in disease diagnosis, prevention, and treatment. API may be synthesized either chemically or through biotechnological methods. They are used in a wide range of therapeutic areas such as oncology and for treatment of conditions such as respiratory disorders and rheumatoid arthritis.

The analysts forecast the API market in the US to grow at a CAGR of 7.01 percent over the period 2014-2019.

Covered in this Report
The report covers the present scenario and the growth prospects of the API market in the US for the period 2015-2019. To calculate the market size, the report considers the revenue generated from the sales of API by vendors in the market. It provides the vendor landscape and a corresponding detailed analysis of the top vendors in the market. The market segmentation is carried out on the basis of: type of production process (synthetic production process and biotechnology-based production process), type of product (conventional API and high-potency API), and type of players (captive and merchant). The report discusses the major drivers that influence the growth of the market. It also outlines the challenges faced by the vendors and the market at large, as well as the key trends that are emerging in the market.
