About Fine Tuning Turbochargers

A turbocharger is a turbine-driven forced induction device, which increases engine power and efficiency by inducing more air into the combustion chamber. This results in improved fuel efficiency and cleaner fuel combustion, improving overall engine performance. An automotive turbocharger consists of three components, namely turbine, compressor, and hub rotating assembly/center housing. Fine tuning turbochargers offer improved performance and durability. These turbochargers are compact and lightweight.

The analysts forecast the Fine Tuning Turbocharger market in the US to grow at a CAGR of 22.81 percent over the period 2014-2019.
