
**Description:**
About Industrial Waste Recycling and Services
The growing volume of e-waste is a major concern globally. Rapid advances in technology and increasing buying power of consumers have resulted in high obsolescence rate of electronic products. Consumers tend to replace older electronic products with latest versions available in the market, leading to dramatic rise in e-waste worldwide. Unscientific disposal of e-waste has triggered serious environmental hazards. Recycling of e-waste enables recovery of precious metals thereby reducing the discharge of serious toxins, chemicals, and heavy metals into the environment.

The analysts forecast the Global E-waste Recycling market to grow at a CAGR of 10.7 percent over the period 2014-2019.
