Ghana's Socioeconomic and Demographic Performance: Past, Present and Future

Description:
This document provides an in-depth look at Ghana, and the basis for the analysis is largely the publisher's own Global Income Distribution Database (C-GIDD). C-GIDD is the world's most comprehensive and detailed database for GDP and income distribution data. The dataset covers 212 countries, 694 subdivisions (states, provinces, etc.) and 997 major cities from 2000 until 2025.

We examine GDP, GDP per capita, household income, income per capita, population, urbanization and socioeconomic class levels, both at the national and sub-national / city level. The analysis cover historical trends as well as future projections (5-20 years). Additionally, we provide useful comparisons to other countries and cities of Africa.
