Global Email Encryption Market 2015-2019

Description:
About E-mail Encryption
Organizations use e-mails to share information and data among employees. As e-mails carry confidential data, it becomes necessary for organizations to safeguard these data from manipulation and theft. E-mail encryption protects the content of an e-mail from being read by anyone except the intended recipients. It uses public-key cryptography to encrypt the message and a private key to decrypt the message.

The analysts forecast the Global E-mail Encryption market to grow at a CAGR of 21.70 percent over the period 2014-2019.
