MLP Profits

Description: MLP Profits is the world's only financial advisory 100% focused on helping investors safely build income and wealth from these underestimated securities.

As President Reagan and his advisors clearly intended, the tax breaks they gave MLPs were aimed at boosting the energy sector.

So it's no surprise that many of the MLPs we recommend in MLP Profits are the strongest plays you'll find in the energy patch: energy-services companies.

These outfits do the essential work of connecting oil and gas producers to refineries, distribution centers and marketing outlets.

In other words, we invest in companies with locked-in fees and contracts. That way we have almost no exposure to price-sensitive commodities themselves.

These are the most reliable cash cows in the energy field, even in the 2008 crash, many energy-related MLPs maintained their distributions, overcoming frozen capital markets and plummeting oil and gas prices.

The MLPs we buy are NOT oil or gas producers. They are supply-chain processors of oil, gas and lucrative natural gas liquids (NGLs).

That means our picks are insulated against the price swings that make oil and gas production stocks so unpredictable and nerve-wracking.

That's why our recommendations are so stable. Our picks don't produce energy. Instead they are the essential "middlemen" who collect lucrative toll fees from the producers.

Look through our portfolio and you'll see pipeline operators, storage managers, import/export terminals, distributors, processors, transporters and shippers who handle and move the product once it's out of the ground.

Oil and gas prices will rise and fall (as they always do), but these service businesses continue doing their jobs and collecting their fees like clockwork. Best of all, many of these outfits have long-term contracts guaranteeing their fees under any and all price circumstances.

Little wonder our MLP Profits portfolio is blowing away just about every other investment you can name.

Right this minute, the average total return of the MLPs in our three portfolios is 89.6%-and their average yield stands at 5.62%.

And that's just the average. You could cherry-pick the highest yielders we come across and start earning 11.3% on your money right away. Imagine what steady income like that could do for your retirement plans.

Here are some of the MLPs in our portfolios right now. The gains and yields here are current, and we expect them to move even higher in the weeks and months ahead...

- 237% in marine LNG transport-current yield 9.08%
- 409% in midstream energy assets-current yield 3.36%
- 231% in midstream petroleum products-current yield 5.5%
- 356% in oil and gas midstream services-current yield 3.9%
- 260% in pipeline operations-current yield 4.0%
- 204% in gas gathering and processing-current yield 7.0%
- 130% in midstream gas and NGLs-current yield 2.41%
- 111% in gas and petroleum products-current yield 6.0%

You'll quickly see investing in these unique high-yield-plus-strong-capital-gains vehicles can earn you substantially more income in the coming years than you'd ever make in conventional stocks and funds.
Remember, the average total return of the MLPs in our three portfolios is an impressive 89.6%-and their average yield stands at 5.62%.
