India Carbon Black Market Forecast and Opportunities 2020

Description: Carbon black is virtually a pure form of elemental carbon manufactured through incomplete combustion or thermal decomposition of heavy hydrocarbons. Being one of the most important industrial chemicals manufactured worldwide, carbon black finds application in an array of industrial goods and products including tyres, plastics, inks, coatings, etc. Tyre industry is the leading consumer of carbon black, globally, as the industry uses it as a reinforcing filler to improve the longevity of tyres. In India, carbon black market has been riding high on hefty taxes and duties imposed by the Indian government on foreign imports of carbon black. In addition, rising demand for high performance goods has also been driving the use of specialty carbon in India over the past few years. As a result, a large number of premier carbon black manufacturers have expanded their production capacity over the last few years.

According to “India Carbon Black Market Forecast & Opportunities, 2020”, the market for carbon black in India is expected to register around 14% CAGR until 2020. Besides government’s import barriers being in place, the market is hugely benefiting from the gradual shift of tyre manufacturing operations of various tyre majors into India. Availability of cheaper energy sources and lower taxes are the major reasons attracting the global tyre manufacturers to India. This trend is likely to boost the consumption of carbon black in the domestic market over the next five years. In line to this industry development, carbon black companies have also made significant R&D investments, which has led to the emergence of novel products and technologies over the last few years. Major carbon black manufacturers operating in India include Phillips Carbon Black Limited, SKI Carbon, Continental Carbon India, Cabot India, and Himadri Chemicals and Industries Limited. “India Carbon Black Market Forecast & Opportunities, 2020” report elaborates following aspects related to carbon black market in India:
