Port Security Market in North America 2015-2019

Description: About Port Security
Port security refers to physical security implemented in airports and marine ports. Access control, screening, video surveillance, weapon detection, visitor management, intrusion detection, fire detection, and network and cyber security are some of the major types of security provided in airports and marine ports. Need for port security has increased because of growth in terrorist attacks, criminal activities, and smuggling of precious metals, chemicals, weapons, and drugs.

The analysts forecast the Port Security market in North America to grow at a CAGR of 7.44 percent over the period 2014-2019.
