Global Baby Ointment Market 2015-2019

Description: About Baby Ointment
Baby ointments are divided into three categories that include body massage oils, lotions, and medicinal creams. The body massage oil is used for giving soothing massages that help improve the general well-being of the baby while improving blood circulation and helping the baby to sleep. Other baby ointments such as lotions and medicinal creams are designed to treat rashes on the delicate skin of a baby, to heal the skin, and possibly to prevent the rash from reappearing. Baby ointment is also used for various purposes such as for eczema, heat rash, diaper rash, dry skin, cuts, and insect bites.

The analysts forecast the Global Baby Ointment market to grow at a CAGR of 7.06 percent over the period 2014-2019.
