
Description: About Business Jet
A business jet is an aircraft mainly designed to transport a small number of passengers at a premium cost compared to a commercial airliner. Business jets are mostly owned and operated by corporations, wealthy people, government agencies, or commercial business jet operators that provide air charter or air taxi services. There also exist jet card program or fractional ownership schemes that allow customers to use the benefit of business jet travel without the need for full ownership of business jets.

The analysts forecast the Global Business Jet market to grow at CAGRs of 6.80 percent and 1.79 percent in terms of revenue and aircraft delivery, respectively, during the period 2014-2019.
