About Residential and Commercial Security
Residential and commercial security is a form of physical security. Because of increasing instances of theft and burglary in residential areas, need for physical security solutions like intruder alarms and electronic locks has increased. Apart from residences, commercial buildings such as retail stores, shopping malls, warehouses, and office buildings also employ physical security. Physical security in retail stores is a critical issue for retailers globally, primarily because of reduction in their profitability owing to retail shrinkage.

The analysts forecast the Global Residential and Commercial Security market to grow at a CAGR of 15.16 percent over the period 2014-2019.
